

CLIENT BENEFITS

CARBON FREE GROUP
CONNECTED INNOVATION

WORKING WITH THE CARBON FREE GROUP

We provide an extensive and specialist range of services to corporates, developers, architects and government, delivering low cost, low carbon solutions across all areas of building and construction. We can help deliver commercial housing developments to the highest standards, in faster times and at costs that are comparable with traditional housing projects, using new and

innovate working methodologies, processes, products and technologies.

Clients benefit from the expertise of our Board, our member organisations and our partners as well as the range of innovative products and services that we collectively and collaboratively provide. These include:

- 
- Wide-ranging consultancy services to help deliver the most efficient and effective low carbon solutions across all areas of housing development and the built environment
 - Extensive and rigorous measurement, evaluation and impact assessment services that meet and go beyond the requirements of the Home Quality Mark and BREEAM
 - Management of idea-to-market platforms, networks and activities to innovate in projects, products, process and policy
 - Managed research to identify commercial opportunities and issues to decarbonise the built environment
 - Management of IP to build trust and confidence in collaborative systems
 - Additional managed testing and validation services to see ideas through from beginning-to-end
 - Access a powerful network of our members' skills and services to speed up and shortcut the identification and delivery of solutions
 - Specialist skills and services in technology assessment and due diligence, energy systems integration and a wide range of toolkits and data services
 - Access to independent experts, thought leaders, legal and policy advice, research institutions, media and government
 - Engagement with suppliers, product and technology providers and other like-minded organisations through Carbon Free Group events, working groups and collaborations
